Global HR — User Guide

For staff who update the website content (news, jobs, leads, contact). No coding required for day-to-day tasks.

Live site: **https://www.globalhrss.com** Staff login: **https://www.globalhrss.com/admin/**

Companion doc for developers: TECHNICAL.md.

---

1. Site map (what visitors see)

Page	What it is
Home	Company intro, countries, industries, process, latest updates, client logos
About	Story, vision & mission, history, licences, leadership, offices
Training / Certification	Testing & training pathways (scaffolding, mechanical, electrical, etc.)
Highlights	Partnerships & activities (TWI, Rotary, CVT, arrival, photo gallery)
Updates (`news.html`)	News, activities, and **job openings**
Contact	Enquiry form + WhatsApp office links
Job alerts (`subscribe.html`)	Visitors leave email/phone for openings
Japan / TITP	Japan recruitment pages (linked where needed; not in main menu)

Old URLs such as Jobs / Markets / Services redirect into Updates or Home sections automatically.

---

2. Languages and appearance

Visitors can switch language in the header:

- **English**, **Japanese**, **Korean**, **Russian**

They can also toggle **Light / Dark** theme. These preferences are saved in their browser only — they do not change the site for everyone.

---

3. Publishing Updates (News)

Updates appear on:

- Home → **Latest updates** panel
- Highlights page → latest updates section
- Full list: **Updates** (`/news.html`)

Where to edit

Open the Google Sheet **Global HR - Jobs CMS** (client Google account) → tab **News**.

Columns (what to fill)

Column	What to enter
`id`	Unique ID, e.g. `news-jurong-arrival-2026` (no spaces)
`title`	Headline
`summary`	Short teaser for cards / home panel
`body`	Full article text

Column	What to enter
`image`	One cover image path (see below)
`media`	Extra photos/videos for the detail page (optional)
`category`	Free text, e.g. `Arrival`, `Training`, `Exhibition`, `Job opening`
`published_at`	Date as `YYYY-MM-DD` (e.g. `2026-07-12`)
`status`	`active` = visible · `hidden` = draft / removed

Newest `published_at` dates show first.

Photos and videos

- Ask a developer (or someone with repo access) to put files in:

`assets/media/news/{your-news-id}/`

Example: `assets/media/news/news-jurong-arrival-2026/01.jpg`

- In the sheet, set paths like:
- **image:** `assets/media/news/news-jurong-arrival-2026/cover.jpg`
- **media:** several paths separated by `|` or one path per line
- Deploy the website so new files go live (developer / Cloudflare).

Video tips

- Small files: `.mp4` / `.webm` / `.mov` in the folder above
- Large videos (over ~25 MB): use a **YouTube** link in `media` instead of uploading the file

Only `assets/…` paths and trusted YouTube/Vimeo links are shown. Other websites' image URLs will not display.

Show or hide

- Set `status` to `active` to publish
- Set `status` to `hidden` to take offline without deleting

Changes may take up to **about 10 minutes** to appear (browser cache). Hard-refresh the page (Ctrl+F5) if needed.

Categories on Updates page

Visitors can filter by category. Use clear, consistent names (e.g. always `Job opening`, not `Jobs`).

---

4. Job openings

Job openings are shown as items in **Updates**, with category `Job opening`.

You can manage jobs in two ways:

A. Admin portal (recommended for jobs)

- Go to **https://www.globalhrss.com/admin/**
- Sign in with your staff username and password
- Open the **Jobs** dashboard
- **Add new job**, or edit / hide / delete existing ones

Fields typically include title, company, location, type, industry, description, apply email, and status (`active` / `hidden`).

Public site updates within a few minutes (same cache as news).

Footer link: **Staff login**.

B. News sheet (optional)

You can also add a News row with `category` = `Job opening` if marketing wants a richer story + gallery. Coordinate with whoever manages the Jobs tab so listings stay consistent.

Passwords

- Passwords are set by a developer via Apps Script — **never type a real password into the Google Sheet**
- Maximum **3** admin accounts
- To disable someone without deleting: set `active` to `FALSE` on the **Admins** tab

If you forget a password, ask the technical contact to reset it with `setupAdminPassword`.

---

5. Job alert leads (Subscribe)

When visitors submit **Job alerts** (`/subscribe.html`), a row is added to the sheet tab **Leads**.

Column	Meaning
`name`, `email`, `phone`	Contact details
`source` / `campaign`	Where they came from (website / UTM)
`consent`	They agreed to be contacted
`created_at`	When they signed up
`status`	You can set manually: e.g. `contacted`, `closed`

Workflow suggestion

- Check **Leads** regularly
- Contact the person
- Update `status` so the team knows it was handled

Do not share the spreadsheet outside the authorized staff Google account.

---

6. Contact enquiries

The **Contact** page sends messages through **Formspree** (email inbox configured for Global HR).

Special links:

Link	What happens
`contact.html?reason=licence`	Prefills a **licence verification** request (used instead of direct PDF download)
`contact.html?reason=training`	Prefills / routes toward **training booking** interest

Licence PDFs are **not** publicly downloadable. Always handle licence requests via the contact form.

WhatsApp buttons on Contact open the chosen office chat.

---

7. What you can change without a developer

Task	How
Publish / hide a news story	**News** tab → `status`
Edit news title, summary, body, date, category	**News** tab
Add / edit / hide jobs	**/admin/** dashboard

Task	How
Follow up job-alert signups	**Leads** tab
Reply to contact forms	Formspree / email inbox

---

8. What needs a developer

Task	Why
Upload new photos/videos into `assets/…` and deploy	Files must be in the website project + Cloudflare
Change Home, About, Highlights, Training page text or layout	Content is in HTML
Add client logos to the homepage marquee	Code + image files
Change navigation / footer links	JavaScript layout files
Add a new language string or fix a translation	`i18n` files
Change Formspree or Google Apps Script setup	Technical config
Reset admin passwords / add a 4th admin	Apps Script + Admins tab rules
Deploy after media uploads	Cloudflare Workers

Staging folder `assets/images/new images/` is **not** on the live site. Photos there must be copied into the proper `assets/…` folders and deployed first.

---

9. Quick checklists

Publish a news item

- ■ Write title, summary, body in **News**
- ■ Set `id`, `category`, `published_at` (`YYYY-MM-DD`)
- ■ Add cover `image` path (and `media` if needed)
- ■ Confirm media files are deployed on the live site
- ■ Set `status` = `active`
- ■ Check Home panel and `/news.html` (hard-refresh if needed)

Publish a job

- ■ Log in at `/admin/`
- ■ Add job → set status **active**
- ■ Confirm it appears under Updates / Job opening
- ■ When filled, set **hidden** or delete from the dashboard

After a job fair / campaign

- ■ Export or review new **Leads**
- ■ Mark contacted leads in `status`
- ■ Publish fair photos as a News item if desired

---

10. Troubleshooting

Problem	What to try
New news/job not showing	Wait ~10 minutes; hard-refresh (Ctrl+F5); confirm `status` is `active`

Problem	What to try
Photo missing	Path must start with `assets/…` and the file must already be deployed
Video too big / fails	Use YouTube link in `media` instead
Cannot log in to admin	Check username; ask tech to reset password; confirm account `active`
Contact form not arriving	Check Formspree dashboard / spam; ask tech to verify endpoint
Wrong language on your PC	Use the language control in the site header

---

11. Contacts & links

Resource	URL / note
Public website	https://www.globalhrss.com
Updates	https://www.globalhrss.com/news.html
Job alerts signup	https://www.globalhrss.com/subscribe.html
Staff admin	https://www.globalhrss.com/admin/
Facebook	https://www.facebook.com/GlobalHRSS
TikTok	https://www.tiktok.com/@global.hr2001
CMS spreadsheet	Google Drive — **Global HR - Jobs CMS** (client account)
Developer setup	scripts/google-sheets/SETUP.md

Keep admin passwords and the spreadsheet access limited to authorized staff only.
